

ABDUL HASEEB

Backend-Focused Full-Stack Developer | MERN · Java / Spring Boot

Lahore, Pakistan | bleddyn000@gmail.com | +92-3200564525 | linkedin.com/in/abdulhaseebdeveloper

PROFESSIONAL SUMMARY

MERN developer with 2+ years building web and mobile apps, currently working as a MERN Stack Developer at RDEENS in Lahore. I also work with Java and Spring Boot, and I'm looking to move into a backend-focused role. I've built and deployed several projects on my own, including a multi-tenant RAG chatbot system and a ride-hailing app, handling everything from API design to database schema to deployment on DigitalOcean, Render, and Vercel.

TECHNICAL SKILLS

Backend: Node.js, Express.js, Java, Spring Boot, REST API design, Authentication & Authorization (JWT)

Databases: MongoDB, SQL (MySQL/PostgreSQL), Redis, Qdrant (vector DB)

Frontend: React.js (JSX), HTML, CSS, JavaScript, Tailwind CSS, React Native (Expo)

Deployment & Tools: DigitalOcean, Render, Vercel, Netlify, Cloudinary, Git/GitHub, Docker (basic)

Other: AI/RAG systems (semantic search, vector databases), Socket.IO, BullMQ / job queues

EXPERIENCE

MERN Stack Developer | RDEENS — Lahore, Pakistan

Present

- Build and maintain full-stack client projects using MongoDB, Express.js, React, and Node.js.
- Design REST APIs, handle data modeling, and integrate third-party services.
- Work directly with clients to gather requirements and ship features.

KEY PROJECTS

Enterprise RAG Chatbot Platform — Node.js, MongoDB, Qdrant, Redis, OpenAI

- Built a multi-tenant RAG system end to end — ingestion pipeline, semantic caching, and hybrid sparse/dense retrieval with confidence-based ranking.
- Fixed a PDF table-extraction bug that was leaking raw text into responses.

express-mapper (Open Source npm Package) — Node.js, AST Analysis

- Published an npm package that scans an Express.js codebase and generates an interactive visual graph of its routes and architecture.

ManoRide — Ride-Hailing App — React Native (Expo), Express.js, MongoDB, Socket.IO

- Built backend services and real-time driver tracking for a women-driver ride-hailing app, plus several screens on the React Native side.

API Ghost (Chrome Extension) — JavaScript, Chrome Extension APIs

- Built a browser extension that detects live JSON schema changes on API responses in real time.

EDUCATION

Bachelor's Degree (In Progress) — Virtual University of Pakistan
